Beginner Strategies That Actually Work

Beginners fail because they copy advanced strategies too early.

Here are **simple strategies that work** when executed correctly:

Strategy 1: Simplicity First

- • Fewer assets
- • Clear rules
- • No emotional decisions

Complexity kills consistency.

Strategy 2: Risk Comes First

- • Never risk money you need
- • Small position sizes
- • Survival is success

Staying in the game matters more than fast

wins.

Strategy 3: Education Over Action

- • Understand what you own
- • Know why you entered
- • Know when you exit

If you can't explain your strategy, you don't have one.

Strategy 4: Long-Term Thinking

Crypto rewards:

- • Discipline
- • Patience
- • Planning

Not luck.
