

## **Safety Rules (Read This First)**

**Golden Rule:** Your seed phrase is NEVER needed to claim anything.

### **Common scam patterns**

- Fake airdrop sites that drain wallets
- “Support” DMs asking you to verify wallet
- Fake token approvals (unlimited spending)
- Lookalike domains (one letter off)

### **Safe habits**

- Use a separate “airdrop wallet”
- Keep your main funds in a separate wallet
- Bookmark official sites
- Don’t connect your wallet to random sites
- Review permissions regularly

### **Taxes (simple note)**

In many places, airdrops and rewards may be taxable. Keep a basic log:

- Date received
- Token name
- Approx value

- • Date sold (if sold)

*(This is not tax advice — consider a tax professional.)*
